

ProTek Package

The ProTek Package combines three of our corrosion preventing solutions in order to completely isolate your pipe from any metal-to-metal contact. This grouping of products allows pipe movement to occur seamlessly without causing any abrasion issues. It was originally developed for use in demanding offshore environments where the cost of maintenance and repair can easily exceed millions over the lifespan of the facility. The ProTek Package minimizes the need for costly inspections and pipe repairs, which is why it is now being used by customers everywhere who care strongly about the total cost of ownership.

BENEFITS

- » Low cost of installation: no welding, hot work permits or highly skilled personnel required
- » Product minimizes maintenance and operational costs throughout the lifetime of the piping system.
- » Wear Pad inside diameter (ID) precisely matches outer diameter of pipe
- » Wear Pad ID is pre-roughened for exceptionally high epoxy-to-wear pad bonding strengths as verified by ASTM D5528-01
- » APP provides on-site installation training and inspection services for all fabricators, constructors and end users that install our products at no charge.
